

Native Plant Signs for Your Nursery or Display Garden (listed by Latin name)

The Northwest Michigan Invasive Species Network has the following native plant sale signs available for your use. Signs are printed on 7x5" aluminum and fit easily into a 30" metal sign stake for easy, professional display. Please [contact us](#) for pricing information and orders, or to obtain high-quality PDFs for free, as these signs were developed using a Creative Commons license.

If you intend to sell or plant any native plants for which signs have not yet been developed, please list them at the bottom. We will make additional signs and/or PDFs available to you as soon as possible within the limits of available staff time. To determine whether a plant qualifies as native to Michigan, use the University of Michigan's *Michigan Flora* (michiganflora.net/).

Research suggests that customers are more willing to pay for plants labeled as native and non-invasive. Read more at:
